AirTouch™ F20

Caring for your AirTouch™ F20 cushion

With ResMed's UltraSoft™ memory foam cushion, you'll experience incredible softness with the same high performance as silicone. But unlike silicone, keeping your memory foam fresh requires an entirely different kind of care. So, think of your memory foam cushion like you would a toothbrush. Replace it when it starts to show wear.

Discard at signs of deterioration

Replace at signs of deterioration

Clean with alcohol-free wipes only
